**Student Placement - Junior Nutritionist – Nutrition & Scientific Affairs Department**

This exciting year long placement opportunity, in part fulfilment for your degree, is an excellent opportunity to work with nutritionists in industry for one of the largest global food manufacturers.

The position is based within the Nutrition and Scientific Affairs team at the Talbot Road site in Manchester.

The successful candidate will be part way through a nutrition degree, this could be in the field of public health nutrition, health and nutrition or food and nutrition. We are looking for a highly motivated candidate who is enthusiastic about food and nutrition. The candidate will require confidence to work in the fast pace and tenacious office environment.

Reporting to the Nutritionist for Scientific Affairs, your placement forms a key part of the Nutrition team at Kellogg and requires a significant level of responsibility and accountability. Your main responsibilities will include sourcing, cataloguing and summarizing scientific research in support of nutrition and health claims. You will also be involved in a wide variety of nutrition and health projects such as labelling, nutrition profiling and marketplace understanding. You will also gain experiencing responding to external queries for dietary and product related advice. You will have the opportunity to disseminate key health messages at conferences to academics and key opinion formers.

You will receive coaching and development from a team of qualified nutritionists and dietitians in all areas of nutrition such as child health, adult health, shape maintenance and nutrient requirements. You will also gain exposure to the political and legislative arena of the UK food industry.

Please note that this is a nutrition and public health placement and does not include laboratory work or food development.

This is a paid placement. Terms and conditions will be discussed with the successful candidate.

**Skills Required:**

Good computer literacy with Microsoft Office programs (especially PowerPoint, Excel and Word), and good writing skills. You will be required to collate presentations and reports.

Excellent organisational skills; you will be required to catalogue and store all of your research.

Good people and communication skills are essential as you will be required to liaise with several departments in all areas of the business.
Good presentation skills – you will be required to present your work regularly.

Ability to:

Work with your team on several projects simultaneously.
Work diligently unsupervised, working to milestones and providing regular updates on your work.
