

UNIVERSITY OF LEEDS
FACULTY OF MATHEMATICS AND PHYSICAL SCIENCES
TAUGHT POSTGRADUATE ADMISSIONS POLICY
2017

This document outlines the Faculty of Mathematics and Physical Sciences Taught Postgraduate Admissions Policy for 2017 entry. It supports the admissions principles and policies of the University of Leeds, as outlined in the University of Leeds Taught Postgraduate Admissions Policy (downloadable from the University website at www.leeds.ac.uk/pgtadmissionspolicy) and should be considered alongside this document. This policy will be reviewed on an annual basis.

The Faculty of Mathematics and Physical Sciences Taught Postgraduate Admissions Policy applies to the following programmes:

School of Chemistry

MSc Chemical Biology and Drug Design
MSc Chemical Process Research and Development
MSc Polymers, Colorants and Fine Chemicals

We do not currently offer any part time or distance learning courses.

School of Food Science and Nutrition

MSc Food Science
MSc Food Science (Food Biotechnology)
MSc Food Science and Nutrition
MSc Food Quality and Innovation
MSc Nutrition

We do not currently offer any part time or distance learning courses.

School of Mathematics

MSc Atmosphere-Ocean Dynamics
MSc Data Science and Analytics
MSc Mathematics
MSc Mathematics and Computer Science
*MSc in Medical Statistics
MSc Statistics
MSc Statistics with Applications to Finance
Graduate Diploma in Mathematics
Graduate Diploma in Financial and Actuarial Mathematics

Courses run jointly with the Business School

MSc Financial Mathematics
MSc Actuarial Finance

**This programme is also offered part time. Please follow the application process as detailed below.*

School of Physics and Astronomy

MSc Physics with Business Management

1. Principles

The Faculty of Mathematics and Physical Sciences ensures that the selection process provides equal consideration for applicants who apply by the relevant closing date. All selection decisions are made on the basis of merit and the ability of each applicant to meet the academic and non-academic criteria for admission to the relevant programme of study.

2. Selection Principles

The Faculty of Mathematics and Physical Sciences will treat all applicants fairly and not discriminate unlawfully on grounds of their age; disability; gender; gender identity; pregnancy or maternity status; race; religion or belief; or sexual orientation.

3. Application process

3.1 How to apply

All applicants for taught postgraduate programmes are encouraged to apply online at www.leeds.ac.uk/students/apply.htm. If applicants apply online it is possible to track the application at each stage of the process.

3.2 General entrance requirements

The typical entrance requirement for the Faculty of Mathematics and Physical Sciences is a good first honours degree of at least a UK lower second class or equivalent. Criteria for entry to individual programmes of study may be higher and applicants are advised to check with the relevant School prior to applying. Exceptions to this academic requirement may be made when applicants can demonstrate significant relevant non-standard experience (e.g. relevant industrial experience at an appropriate level) and their potential for benefiting from the programme is clear.

For programme specific entry requirements please visit the relevant School web pages:

School of Chemistry

www.chem.leeds.ac.uk/postgraduate-taught

School of Food Science and Nutrition

www.food.leeds.ac.uk/postgraduate-taught

School of Mathematics

www.maths.leeds.ac.uk/postgraduate-taught

School of Physics and Astronomy

www.physics.leeds.ac.uk/postgraduate-taught

3.3 Application deadlines

Applicants are encouraged to apply as early as possible for taught postgraduate programmes.

If you intend to apply for funding, you should submit an application for a place at least one month before any specific scholarship deadline.

International students are particularly advised to submit applications as early as possible to ensure they have sufficient time to obtain a visa and prepare for arrival in the UK. Furthermore, an offer of a place is needed for many of the scholarships available to international students and closing dates can often be early in the year.

3.4 International/ Overseas students

All applications from international students are considered in line with our standard entrance requirements. Proof of English Language proficiency will be required and minimum levels and approved tests for the Faculty of Mathematics and Physical Sciences are detailed in the University of Leeds Taught Postgraduate Admissions Policy

www.leeds.ac.uk/pgtadmissionspolicy

Where an applicant does not meet the English language requirements for the academic course, but does meet the requirements for the University of Leeds pre-sessional English Language summer courses, they may be eligible for a combined offer for the pre-sessional and Taught Postgraduate programme. Applicants will be informed via their offer letter if they are eligible for a combined offer, for which they will need to opt in. Applicants with a combined offer needing a CAS will receive a single CAS for the duration of their studies. Applicants must attend the pre-sessional course in order to progress onto the Taught Postgraduate programme. Failure to do so will result in the applicant being unable to join the Taught Postgraduate programme. Applicants can opt out of this route in favour of meeting the English Language requirement by completing one of the English Language tests detailed in Appendix A, Section 2, by declining the offer and contacting tp_applications@leeds.ac.uk. Admissions staff are experienced in considering a wide range of international qualifications against programme entry requirements. Prospective applicants who wish to discuss whether their qualifications will meet the necessary entry criteria should contact the School admissions office directly.

Further information for prospective international applicants can be found on the University of Leeds website at www.leeds.ac.uk/international

3.5 Admissions intake

All programmes within the Faculty of Mathematics and Physical Sciences aim to recruit the highest calibre students, with all places awarded on merit. The allocation of student places is set for each programme on an annual basis.

Programmes within the Faculty, and in particular within the School of Food Science and Nutrition, are generally very popular - we receive a greater number of applications than the number of places available.

3.6 Advanced Entry

Accreditation of prior learning is a process undertaken by the University in order to assess and, as appropriate, recognise prior experiential learning or prior certificated learning for academic purposes. This recognition may give the learning a credit value and allow it to be counted towards the completion of a programme of study. Credit Transfer is the process by

which the University accepts credit arising from prior certificated learning, either awarded by itself or another institution, as contributing to an award of the University.

Any decision on credit transfer or entry of students with advanced standing is an academic decision taken within the relevant School. Applicants are advised to check the relevant School Admissions Policy for further information.

4. Selection process

Academic grades normally form only one part of the final decision and the following sections give examples of how applicants may demonstrate that they have the skills, knowledge and attributes that we believe will enable them to become a successful student in the Faculty of Mathematics and Physical Sciences.

Relevant voluntary or work experience may be taken into account. The applicant would be required to demonstrate that this experience is substantial and relevant to their chosen programme of study. Exceptionally, research publications may be taken into consideration if they demonstrate significant expertise in a relevant field.

Applicants are strongly encouraged to include a personal statement to provide further information about their suitability for their chosen programme of study and the reasons for their choice of programme. A CV may also be included to provide more detailed information about prior experience.

4.1 Interviews

The Faculty of Mathematics and Physical Sciences does not typically undertake interviews with applicants; however, in certain circumstances programme leaders may invite an applicant to interview as part of the selection procedure. This may allow us to further assess the applicant's aptitude and interest in the programme in the cases where the applicant's circumstances are not straightforward.

If invited to interview, you will receive an email invitation from the School to attend an interview on a specific date. We will do our best to accommodate requests for an alternative date, but this cannot be guaranteed.

Interviews may take place via a number of alternative means depending on the circumstances of the applicant. For example, interviews may take place on a one to one basis or via Skype, video conferencing or telephone - particularly for overseas applicants.

4.2 Offers

Offers are made on the basis of merit and the ability of each applicant to meet the academic and non-academic criteria for admission to the relevant programme of study. Offers are made based on the information supplied on the application form, and where required, proof of English Language as detailed in section 2.4. Degree certificates and academic transcripts must also be provided. The University of Leeds Taught Postgraduate Admissions Policy gives further detail on the type of offers that are made.

4.3 Unsuccessful applicants

Unsuccessful applicants may wish to request feedback on the reason for the outcome of their application. All requests for feedback must be made in writing or via email to the relevant Admissions Contact (details below) and signed by the applicant or sent from the email address listed on their application form.

The University's policy on providing feedback to applicants can be found in the University of Leeds Taught Postgraduate Admissions Policy.

4.4 Complaints

The Faculty of Mathematics and Physical Sciences will consider all applications fairly and effectively in line with the procedures outlined in this document and the University of Leeds Taught Postgraduate Admissions Policy. Applicants who wish to challenge a decision to reject their application should write to the appropriate Head of School detailing the nature of their complaint. The complaint must typically be made within 14 days of the decision.

Full details of the complaints procedure can be found in the University of Leeds [Postgraduate Admissions Policy](#).

4.5 Disabled applicants

The Faculty of Mathematics and Physical Sciences welcomes applications from disabled people¹. The University will make appropriate adjustments, to help ensure that disabled applicants have full and equal access to our admissions procedures and courses. Information about disability is not used when considering your academic eligibility for your chosen programme of study. It is reviewed in order to identify your potential study-related support requirements, and your eligibility for disability-related support funding, so that the University can ensure you are supported effectively on your course.

The University will always aim to make appropriate adjustments for disabled applicants. However, applicants who choose not to disclose their disability should be aware that it may be more difficult, or in rare cases impossible, to make the appropriate adjustments. Applicants are invited to indicate their disability status on their application form and we strongly encourage applicants to disclose any disability. Disabled applicants are also advised to contact the University's Disabled Students Assessment and Support team (part of the University's Student Education Service) once an application has been submitted, to discuss any support requirements they may have in relation to the programme for which they have applied. Disabled Students Assessment and Support can be contacted at disability@leeds.ac.uk.

The admissions process is covered by the University's Policy on Equality and Inclusion which is available from the University's Equality Policy Unit at www.equality.leeds.ac.uk/university-policies-2/

¹ The University is committed to the social model of disability and in line with the definition under the Equality Act 2010 defines a disabled person as someone with a physical or mental impairment which is long-term (lasting 12 months or more) and which has a substantial impact of that person's ability to carry out normal day-to-day activities. The definition of disability includes long-term medical conditions such as cancer (from the point of diagnosis), epilepsy, diabetes, Chronic Fatigue Syndrome/ME and HIV/AIDS amongst others.

4.6 Applicants with a health-related issue or other mitigating circumstance

This section deals with health-related issues,² which are distinct from disability-related issues. Applicants with a health-related issue should contact the relevant Admissions contact as soon as possible if their health is likely to impact on their ability to engage with the admissions process. The University aims to be flexible in such circumstances and to take such issues into account.

If a candidate feels that their prior ill-health – or personal circumstances other than ill-health (for example, bereavement or other difficult home or family circumstances) – may have affected their previous education, or the grades they received in past examinations, then they are also welcome to contact the School to discuss this further. All formal requests for mitigating circumstances to be taken into account in the admissions process should be supported by a full declaration about the nature of the circumstances.

4.7 Support for applicants who are pregnant

In line with the University policy on support for students who are pregnant or have young children (available from www.equality.leeds.ac.uk/university-policies-2/) applicants who are pregnant are advised to inform their Admissions Tutor/Officer at an early stage. This is so that consideration can be given to appropriate support being available from the start of their programme of study.

4.8 Deferred Applications

The Faculty of Mathematics and Physical Sciences considers a deferred applicant as one who currently holds an offer but wishes to change the year of entry to the following academic year, or one who applies for the following academic year from the outset. Applicants who wish to defer an offer of a place to the following academic year should contact the Academic School. Deferral of a place to study is at the discretion of the School and is strictly limited to a maximum of one academic year following the year of initial application. Applicants who request deferral for more than one academic year will normally be required to reapply. Except where a 2 year time limit is placed on an English Language qualification, any offer made will not be subject to change.

Applicants who wish to defer an offer of a place to the following academic year should request so via their online application portal.

4.9 Applicants wishing to reapply

Any decision on the eligibility of applicants who have previously held an offer of a place but failed to achieve the academic conditions at first attempt will be an academic judgement. Such candidates should be aware that no guarantee can be given that another offer will be made, and that the conditions of any future offer may differ to those of the original.

4.10 Criminal convictions

The University has a policy statement on students with criminal records, which can be accessed from our website at:

² Which are not classed as a “disability”.

www.leeds.ac.uk/secretariat/documents/applicants_students_criminal_record.pdf. This policy includes applicants seeking admission. It should be noted that if an applicant is required to disclose a criminal offence and fails to do so this will generally be considered a very serious matter and is likely to lead to their application being rejected or, if admitted, to their registration at the University being revoked.

Having a prior criminal record will not necessarily prevent an applicant from being offered a place; this may depend, for example, on the nature, timing and relevance of the criminal offence in question. The University may request further information about the nature or context of an applicant's criminal record.

Where indicated in the prospectus or on the University's website, specific programmes may involve regular access to children and/or vulnerable adults, and applicants may be required to undertake with satisfactory results, certain checks with the Disclosure and Barring Service. The University will send further instructions as part of the admissions process where this is the case.

5. Opportunities to visit

5.1 School Visits

Applicants who wish to visit a School within the Faculty of Mathematics and Physical Sciences may book an appointment by contacting the Admissions Officer using the contact details given at the end of this document.

6. Scholarships & funding

The University of Leeds currently offers a wide range of scholarships and studentships that provide funding for students to undertake postgraduate study at the university. These range from partial funding towards academic fees to fully funded awards which also provide a living allowance.

6.1 University Scholarships

Postgraduate students at Leeds benefit from around £10m of funding from the University and externally. **Postgraduate scholarships** are available to international, UK and EU students and you may be eligible.

6.2 Faculty/school level scholarships information

School of Chemistry

Further details of School level scholarships can be found on our website at: www.chem.leeds.ac.uk/postgraduate-taught

School of Food Science and Nutrition

Further details of School level scholarships can be found on our website at: www.food.leeds.ac.uk/postgraduate-taught/fees-and-funding

School of Mathematics

Further details of School level scholarships can be found on our website at: www.maths.leeds.ac.uk/postgraduate-taught

School of Physics and Astronomy

Further details of School level scholarships can be found on our website at:

www.physics.leeds.ac.uk/postgraduate-taught

7. Contact details

Application enquiries

Admissions enquiries to the **School of Chemistry** should be directed to:

Email: Chem.MSc@leeds.ac.uk

Telephone: +44 (0)113 343 6410

Address: School of Chemistry, University of Leeds, Leeds, LS2 9JT, UK

Admissions enquiries to the **School of Food Science and Nutrition** should be directed to:

Email: mscenquiry@food.leeds.ac.uk

Telephone: +44 (0)113 343 0347

Address: School of Food Science and Nutrition, University of Leeds, Leeds, LS2 9JT, UK

Admissions enquiries to the **School of Mathematics** should be directed to:

Email: maths-msc@leeds.ac.uk

Telephone: +44 (0)113 343 0945

Address: School of Mathematics, University of Leeds, Leeds, LS2 9JT, UK.

Admissions enquiries to the **School of Physics and Astronomy** should be directed to:

Email: phymscadmin@leeds.ac.uk

Telephone: +44 (0)113 343 3839

Address: School of Physics and Astronomy, University of Leeds, Leeds, LS2 9JT, UK.
